SUPPLEMENT

TO THE

MONTHLY AND QUARTERLY RETURNS

OF THE

BIRTHS, DEATHS, AND MARRIAGES

REGISTERED IN

SCOTLAND

DURING THE YEAR

1892;

ALSO THE

VACCINATION RETURNS

RELATIVE TO THE CHILDREN BORN DURING

1891.

PUBLISHED BY AUTHORITY OF THE REGISTRAR-GENERAL.

EDINBURGH: PRINTED BY NEILL AND COMPANY

FOR THE REGISTRAR-GENERAL OF BIRTHS, DEATHS, AND MARRIAGES.

1893.

REPORT.

Herewith is submitted the Report containing the usual details regarding the Births, Deaths, and Marriages registered during the year 1892, in the 1051 Registration Districts throughout Scotland. Appended to the General Report is the Twenty-eighth Report on Vaccination, in which is contained all the available information regarding the administration of the Scottish Vaccination Act, and especially in relation to the vaccination of children born in Scotland during 1891.

TABLE I.—Population estimated to the middle of each year, with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1892, and their Proportion to the Population; also the Excess of Births over Deaths, the Number of Illegitimate Births, and their Proportion to the Total Births.

Year	Estimated Population	Births.		Deaths.	Marriages.	Excess of Births over Deaths.	Percentage to Population.			Per cent of Illeg. to Total Births.
		Total.	Illegit.				Births.	Deaths.	Marriages.

At the middle of the year under review (1892) the estimated population of Scotland was 4,063,452; of those 1,961,401 were males, and 2,102,051 females.

During the year there were registered 125,011 births, 75,568 deaths, and

Marriages	26574	0·71	26855	0·71	26061	0·68	25256	0·66	24469	0·63	24851	0·64	25281	0·64	26318	0·66	27441	0·69	27949	0·69	0·67	28637	0·70

28,637 marriages. Hence for every hundred of estimated population, there were 3·08 births, 1·86 deaths, and 0·70 marriages. When these numbers are compared with the corresponding numbers for the previous year (Tables I. and II.) the birth-rate and death-rate are seen to be lower than for last year, while the marriage-rate is higher.

BIRTHS.

125,011 births were registered in Scotland during 1892, being at the rate of 3·08 per cent., or 308 for every ten thousand of estimated population; of these 64,371 were males, and 60,640 females.

Tables IV. and V. afford information as to the number and proportion of births in the five groups of Registration districts into which Scotland is divided. In the Principal Town districts 47,279 births were notified, being at the rate of 3·21 for every hundred of the estimated inhabitants, 24,383 being males and 22,896 females; in the Large Town districts the total number is 16,252, or 3·35 per hundred of population, the males being 8,255, the females 7,997; in the Small Town districts, the births are 26,270, equal to 3·15 per cent. of the inhabitants, males 13,603, females 12,667; in the Mainland-Rural districts, the total amount is 32,347, or in proportion of 2·83 to each hundred of the inhabitants, males numbering 16,628, females 15,719; and in the Insular-Rural districts, the total amount is 2,863, or 2·28 per hundred, males 1502, females 1361. From these ratios it is apparent that the highest birth-rate occurred in the Large Town districts, followed by that in the Principal Town districts, Small Town districts and Mainland-Rural districts, being lowest in the Insular-Rural districts.

9,183 of the total 125,011 births were illegitimate, equivalent to 7·35 per cent. of all. The rate varies in each district, being 8·4 per cent. in the Mainland-Rural districts, 7·3 per cent. in the Principal Town districts, 7·0 per cent. in the small Town districts, 6·1 per cent. in the Large Town districts, and 6·0 per cent. in the Insular-Rural districts.

Table VI. indicates the relative frequency of illegitimacy in the various geographical divisions into which the whole country is sub-divided, as also in each county separately. Among the former the highest rate is in the Southern, where 13·4 per cent. of all the births are of this nature, followed by the North-Eastern with 12·5 per cent.; the Northern with 7·9 per cent.;

TABLE III.—Births, Deaths, and Marriages in each of the Eight Divisions of Scotland during the Year 1892, and their Proportion to the Estimated Population.

Divisions.	Population estimated to middle of 1892.	Births.		Deaths.		Marriages.

cent.; in Aberdeen, 12·6 per cent.; in Elgin, 13·0 per cent.; in Banff, 13·2 per cent.; in Dumfries, 15·1 per cent.; and in Wigtown, 16·3 per cent.

Of the total 125,011 births during the year, 64,371 were boys, and 60,640 were girls, so that for every hundred of the latter sex, 106·2 boys were born. The highest proportion of male to female births occurred in the Insular-Rural districts, 110·4 to 100, the lowest in the Large Town districts, 103·2 to 100.

Births were registered throughout the country in largest numbers during June, when they were at the rate of 370 per diem; April and May coming next, each with 362 daily; February, March, and November, each with 341; December with 339; August with 336; July with 335; October with 333; September with 320; and January with 318. The daily average number of births registered during the year was 342, males 176, females 166. The average daily number of illegitimate births was 25.

DEATHS.

75,568 deaths were registered throughout Scotland during the year, being in the proportion of 1·86 per cent., or 186 in each ten thousand of estimated population, a ratio lower than that for last year.

Table V. shows the heaviest rate to have occurred in the Principal Town districts, where it was 210 per ten thousand of population, followed by the Large Town districts with a mortality rate of 184; the Small Town districts with one of 182; the Mainland-Rural with one of 161; and the Insular-Rural with one of 159; ratios which, when compared with the corresponding ratios for last year, show a decrease in all the districts.

The average daily number of deaths was greatest during January, 276, followed by December, 235; March, 232; February, 231; April, 219; May, 208; November, 203; June, 185; October, 178; August, 173; July, 170; and September, 166. The average daily number of deaths was 206.

MARRIAGES.

The number of marriages registered during 1892 was 28,637, being at the rate of 70 for every ten thousand of population, which shows an increase upon the same for last year.

The marriage-rate is highest in the Principal Town districts, where it is 87 per ten thousand of the inhabitants of the same, followed by the Large Town districts with a rate of 74; the Small Town districts with one of 66; the Mainland-Rural districts, with one of 55; and the Insular-Rural districts with one of 34.

The average daily number of marriages was greatest during June, 142; followed by January, 125; December, 119; July, 98; November, 68; April and August each with 61; September and October each with 59; February and March each with 56; and May with 34. The daily average for the year was 78.

EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND.

The information upon which the remarks are founded in the following sections of this report is furnished by the Registrars of the following Principal Towns, viz., Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, in their weekly returns, and it is believed the facts which relate to them apply in a great extent to the country at large.

BIRTHS IN THESE EIGHT TOWNS.

The number of births registered in the above towns during the year was 46,395, being at the rate of 320 for every ten thousand of their estimated population. The highest rate occurred in Greenock, where it was 358 per ten thousand; next in Glasgow, with 341; followed by Paisley, with one of 328; Leith, with 326; Dundee, with 314; Aberdeen, with 308; Perth, with 278; and Edinburgh, with 271.

Of the total 46,395 births, 3,439 or 7·4 per cent. were illegitimate, the highest rate occurring in Aberdeen, viz., 9·7 per cent.; followed by Dundee, with 9·3 per cent.; Edinburgh, with 8·3 per cent.; Perth, with 8·2 per cent.; Glasgow, with 7·0 per cent.; Paisley, with 5·6 per cent.; Leith, with 5·0 per cent.; and Greenock, with 4·7 per cent. Table VIII. also indicates the percentage of illegitimate children born during 1892 to the estimated number of possible mothers living in these towns. *i.e.*, the spinsters and widows between the ages of 15 and 45. Thus in Aberdeen 1·90 infants were born out of wedlock for every hundred possible mothers, as stated; in Glasgow, the percentage is 1·74; in Dundee, 1·73; in Perth, 1·45; in Leith, 1·44; in Greenock, 1·40; in Edinburgh, 1·27; and in Paisley, 1·16.

Of the 46,395 children born in these eight towns during the year, 23,951 were of the male, and 22,444 of the female sex, the proportion of boys to girls being 106·6 to 100.

DEATHS IN THESE EIGHT TOWNS.

The deaths registered in these towns during 1892 number 30,490, of whom 15,317 were males, and 15,173 females; the total mortality-rate being 211 per ten thousand of estimated population.

Table VIII. shows the death-rate in Glasgow to be the highest, viz., 228 per ten thousand of estimated population; followed by Leith, with a rate of 209; Aberdeen, with 205; Greenock, with 197; Perth, with 196; Edinburgh, with 194; Dundee, with 190; and Paisley, with 186.

If compared with the corresponding death-rate for 1891, it is apparent (Table IX.) there is an increase in Aberdeen and Leith, and a decrease in the remaining towns; and when further compared with the mean death-rates for the last ten years, the same result is found.

Table X. affords some insight as to the mortality among children under five years of age in these eight towns, one column giving the deaths among children at this age in each town, another column the percentage of deaths

of children under five years of ago, and a third the percentage of deaths at the same age to the total deaths. Thus we find in Leith that out of every

TABLE VII.—Births, Deaths, and Marriages, and their Proportion to the Population, in the Principal Town Districts of Scotland, during each of the Years 1855–1892.

thousand such children estimated to be alive there, 75 died during the year; in Glasgow, the ratio was 74; in Edinburgh, 62; in Aberdeen, 61; in Dundee, 58; in Greenock, 54; in Paisley, 49; and in Perth, 43. The last column of the table shows how, of the total deaths in Leith, 46·1 per cent. occurred among children under five years of age; in Glasgow, 41·3; in Aberdeen, 36·7; in Dundee, 35·5; in Greenock, 34·4; in Edinburgh and Paisley, 34·3; and in Perth, 24·5.

Table XI. and XII. present the rate of mortality due to various classes of diseases, and to some of the more important special causes of death in each of the eight towns, such rate being calculated in the former table with reference to the estimated population, and in the latter with reference to the total deaths from all causes.

The percentage of deaths from Zymotic diseases was 0·342 on the total estimated population of the towns, forming 16·24 per cent. of the total mortality occurring therein. This class of disease proved fatal to 0·518 per cent. of the population in Leith; to 0·380 per cent. of that of Aberdeen; to 0·378 per cent. of that of Glasgow; to 0·326 per cent. of that of Edinburgh; to 0·257 per cent. of that of Paisley; to 0·228 per cent. of that of Dundee; to 0·213 per cent. of that of Greenock; and to 0·160 per cent. of that of Perth. The corresponding percentages of deaths from these same diseases to the total deaths are 24·74 in Leith; 18·58 in Aberdeen; 16·82 in Edinburgh; 16·62 in Glasgow; 13·79 in Paisley; 11·98 in Dundee; 10·82 in Greenock; and 8·15 in Perth.

In Glasgow, out of every hundred deaths, 5·12 were attributed to Measles;

Table X.—Deaths of Children under Five Years of age in each of Eight of the Principal Towns of Scotland during the Year 1892.

Towns.	Estimated Number of Living Children under 5 years in 1892.	Deaths under 5 years of age.	Percentage of Deaths under 5 years.	Percentage of Deaths under 5 years to the Total Deaths.
Glasgow	84,860	6,294	7·42	41·3
Edinburgh	28,400	1,763	6·21	34·3
Dundee	18,139	1,047	5·77	35·5
Aberdeen	15,661	958	6·12	36·7
Leith	9,073	676	7·45	46·1
Paisley	8,850	433	4·89	34·3
Greenock	7,964	427	5·36	34·4
Perth	3,349	145	4·33	24·5

3·89 to Hooping-Cough; 2·03 to Scarlet Fever; 1·72 to Diarrhœa and Dysentery; 1·08 to Diphtheria; 0·78 to Fevers, of which 0·70 were Enteric or Typhoid, and 0·7 Typhus; 0·71 to Influenza; and 0·04 to Small-Pox.

In Edinburgh, Measles causes the heaviest mortality in like proportion, 7·87 per cent. of the total deaths being due to it; Hooping-Cough caused 1·68 per cent.; Diarrhœa and Dysentery, 1·52 per cent.; Influenza, 1·46 per cent.; Scarlet Fever, 1·40 per cent.; Diphtheria, 0·82 per cent.; Fevers, 0·68 per cent., of which 0·58 are Typhoid, 0·06 Typhus, and 0·04 Simple or Ill-defined Fever; and Small-Pox, 0·02 per cent.

In Dundee, 3·70 per cent. of all the deaths were due to Diarrhœa and Dysentery; 1·97 per cent. to Measles; 1·70 per cent. to Fevers, of which 1·46 are Enteric, and 0·20 Typhus; 1·36 per cent. to Hooping-Cough; and 0·85 per cent. to Diphtheria.

In Aberdeen, Measles is the cause of 5·58 per cent. of the total mortality; Hooping-Cough of 3·96 per cent; Influenza of 2·81 per cent.; Diphtheria of 1·69 per cent.; Diarrhœa and Dysentery of 1·65 per cent.; and Fevers of 0·73 per cent., of which 0·50 is Enteric, and 0·19 Typhus.

In Leith, 14·29 per cent. of the total deaths is ascribed to Measles; 2·46 per cent. to Diarrhœa and Dysentery; 2·39 per cent. to Scarlet Fever; 1·23 per cent. each to Hooping-Cough and Diphtheria; 0·89 per cent. to Fevers, of which 0·62 is Typhus, and 0·27 Typhoid; and 0·55 per cent. to Influenza.

TABLE XI.—Percentage of Deaths from different Diseases to the Population in each of Eight of the Principal Towns of Scotland during the Year 1892, allowing for the Causes not specified.

In Paisley, 4·68 per cent. of the mortality is due to Hooping-Cough; 2·22 per cent. to Diarrhœa and Dysentery; 1·74 per cent. to Fever, all of which is Enteric; 1·19 per cent. to Diphtheria; 0·87 per cent. to Measles; 0·79 per cent. to Scarlet Fever; and 0·48 per cent. to Influenza.

In Greenock, 2·66 per cent of the total deaths is ascribed to Diarrhœal affections; 2·26 per cent. to Hooping-Cough; 1·37 per cent. to Scarlet Fever; 0·97 per cent. to Diphtheria; 0·89 per cent. to Influenza; and 0·64 per cent. to Fevers, of which 0·32 is Typhus, and 0·32 Typhoid.

In Perth, Diphtheria causes the highest ratio of such deaths, viz.:—1·87 per cent; Diarrhœa and Dysentery, 1·53 per cent.; Influenza, 1·02 per cent; Scarlet Fever, 0·85 per cent.; and Fevers, 0·67 per cent., all of which were Enteric.

In the eight towns collectively, there were registered 1601 deaths from Measles, being at the rate of 5·28 per cent. of the total mortality, or 11·1 per ten thousand of population. Hooping-Cough caused 920 deaths, or 3·04 per cent. of the total mortality, and equal to 6·4 in each ten thousand of population. Diarrhœa and Dysentery combined caused 596 deaths, or 1·97 per cent. of all, and equal to 4·1 per ten thousand of population. Scarlet Fever caused 482 deaths, or 1·56 per cent. of the total mortality, equal to 3·3 per ten thousand of population. Diphtheria caused 330 deaths, or 1·09 per cent. of all, or 2·3 per ten thousand of the inhabitants. Influenza caused 294 deaths, or 0·97 per cent. of the total deaths, equal to 2·0 per ten thousand of population. Fevers caused 269 deaths, 0·89 per cent. of

TABLE XII.—Percentage of Deaths from different Diseases to the Total Deaths in each of Eight of the Principal Towns of Scotland during the Year 1892, allowing for the Causes of Death not specified.

DISEASES CAUSING DEATH.	Total Eight Towns.	Glasgow.	Edinburgh.	Dundee.	Aberdeen.	Leith.	Paisley.	Greenock.	Perth.

all, or 1·9 per ten thousand of the inhabitants; of these, Enteric or Typhoid caused 225 deaths, and Typhus 38; the former most marked in Glasgow, Dundee and Paisley, the latter in Dundee, Leith, and Greenock.

Small-Pox caused 7 deaths, 1 occurring in October, 5 in November, and 1 in December. Of these 6 occurred in Glasgow, 4 being males, aged 4 weeks, 21, 37 and 45 years respectively, and 2 females, aged 28 and 31 years; and 1 in Edinburgh, a male, 50 years of age.

Zymotic Diseases together caused 4,923 deaths, being 452 more than last year. An increase is seen in the case of Measles, Scarlet Fever and Diphtheria. 123 deaths are ascribed to Syphilis, 121 to Erysipelas, and 99 to Puerperal Fever.

Constitutional Diseases caused 5,266 deaths, or 17·38 per cent. of all, and equal to 36·6 in every ten thousand of population. Rheumatism and Rheumatic Fever caused 105 deaths. Cancer caused 985 deaths, equal to 3·25 per cent. of all, or 6·8 in every ten thousand of population, being most apparent in Aberdeen, Edinburgh and Dundee; 4 deaths were ascribed to Gout. Phthisis caused 2,931 deaths, 9·67 per cent. of all, or 20·4 per ten thousand inhabitants—Perth, Glasgow, Paisley and Dundee, showing in this respect the highest proportion to the population. Tubercular Meningitis caused 443 deaths, Tabes Mesenterica, 359, and other forms of Tubercular conditions, 263 deaths.

From Diseases of the Nervous System there are 3,553 deaths, equal to 11·72 per cent. of the total mortality, and in the proportion of 24·7 in every ten thousand of estimated population. The percentage of such deaths to the total mortality was 15·25 in Greenock, 12·05 in Perth, 12·04 in Paisley, 11·96 in Aberdeen, 11·85 in Edinburgh, 11·71 in Dundee, 11·46 in Glasgow, and 10·25 in Leith; the rate per ten thousand inhabitants being 30·1 in Greenock, 26·1 in Glasgow, 24·5 in Aberdeen, 23·6 in Perth, 23·0 each in Edinburgh and Dundee, 22·4 in Paisley, and 21·4 in Leith.

Diseases of the Organs of Circulation are the registered cause of 2,330 deaths, or 7·69 per cent. of all, and equal to 16·2 in every ten thousand of population. Perth shows a percentage on the gross mortality of 10·87; Edinburgh, one of 10·27; Greenock, of 9·69; Dundee, of 8·92; Paisley, of 8·24; Leith, of 8·00; Aberdeen, of 7·92; and Glasgow, of 6·16.

To Diseases of the Respiratory Organs (excluding Phthisis) 6,629 deaths are ascribed, equal to 21·87 per cent. of the total, and 46·1 in every ten thousand of estimated population. Glasgow comes first, with 24·11 per cent. of the total deaths thus registered; followed by Perth, with 23·77 per cent.; Dundee, with 22·50 per cent.; Edinburgh, with 19·47 per cent.; Leith, with 18·93 per cent.; Greenock, with 18·48 per cent., Aberdeen, with 18·12 per cent.; and Paisley, with 17·04 per cent. 3,097 of the deaths from diseases of this nature are due to Bronchitis, constituting 10·22 per cent. of the whole mortality; Perth, Dundee, and Glasgow show the highest rates respectively. Pneumonia caused 2,478 deaths, Pleurisy, 206, and Croup, 176.

From Diseases of the Organs of Digestion 1,922 deaths occur, being at the rate of 6·34 per cent. of all, and 13·4 in every ten thousand of population. Enteritis is the cause of 386 deaths; Peritonitis, of 265; Dentition, of 205; and Liver Disease, of 306.

To Diseases of the Urinary Organs 726 deaths are ascribed, equal to 2·40 per cent. of the total, and 5·0 per ten thousand of population. Acute Nephritis caused 157, and Bright's Disease, 263 deaths.

Premature Birth accounts for 815 deaths, Congenital Malformations, 161, and Old Age for 1,064.

Atrophy and Debility was the assigned cause of death in 947 instances, and Dropsy in 47 while in 183 cases the cause of death was ill-defined or not stated.

In 1,116 cases Violence is the cause of death, equal to 3·68 per cent. of the total mortality, or 7·8 in every ten thousand of population. Of these, 1,055 were due to Accident or Negligence, 3 to Homicide, 57 to Suicide, and 1 to Execution. 83 deaths were ascribed to Intemperance.

In the above Towns 112 persons died during the year at ages of 90 years or over; 29 being men, and 83 women. Two men, the one a tailor and the other a retired gas company collector, reached the age of 98 years.

MARRIAGES IN EIGHT TOWNS.

12,686 Marriages were recorded during the year, being at the rate of 88 for every ten thousand of estimated population. In Glasgow, 92 Marriages took place in every ten thousand of the population; in Edinburgh, 90; in Aberdeen, 84; in Dundee, 83; in Perth, 81; in Paisley, 80; in Leith, 78; and in Greenock, 77.

WEATHER AND ITS INFLUENCE ON MORTALITY.

The following remarks on the weather of the year are extracted from the Notes of the Astronomer-Royal, which appear in the Registrar-General's Quarterly Reports:—

The month of January 1892 was decidedly cold and dry with relatively steady barometric pressure.

February was a month of low and very irregular barometric pressure, a mean temperature decidedly below the average, and a relatively small precipitation of moisture spread over an unusual number of days.

March was on the whole an exceptionally cold and dry month, with a large range of temperature, a high and steady barometer, low wind pressure, and a slight excess of winds from the north and east.

The month of April was somewhat cold and variable in temperature, exceptionally dry, with high and steady barometric pressure, accompanied by moderate air movement, in which northern and eastern are most frequently represented.

The month of May was relatively warm and rainy, while barometric pressure was normal both in amount and range.

June was on the average a cold and wet month, while the barometric pressure was nearly normal, though with slightly greater range than usual.

In July the barometric pressure was high and attended with an amount of variation quite unusual for this season.

The weather of August was chiefly characterised by low temperature and excessive rainfall, accompanied by a barometric pressure and range below the average for this month.

The month of September was very cold and windy, with a normal amount of rainfall spread over rather more days than usual.

The month of October was unusually wet and cold, with a strongly marked preponderance of northerly winds. The barometric pressure, while strictly normal as to range, was decidedly low.

The month of November was relatively warm, with a slightly high and very steady barometer accompanied by a very marked preponderance of winds from the south and south-east.

TABLE XIII.—Monthly Mortality and Mean Temperature in Scotland during 1892, compared with the Mean of the Ten Years 1881–1890.

MONTHS.	YEAR 1892.			1881-1890.

The month of December was extremely cold, dry, and calm for the season. In accordance with these features, the barometer, while somewhat higher than usual, was exceptionally steady; indeed the monthly range was lower than in any December since the commencement of these returns in 1856.

Reference to Table XIII. admits of comparison being made between the mean temperature and proportionate mortality of each month of 1892, and the same for a decennial period 1881–1890. This indicates the months of April, May, and November of 1892 to have had a slightly greater mean temperature than the corresponding months of the ten years, that for the other nine months being the reverse. The greatest proportionate mortality occurred during the year under review in January, December, March, and February—those months which, on the whole, show the lowest mean thermometric readings; the lowest death-rate being during September, July, and August. Further information of like nature, deduced from observations made at fifty-five Stations of the Meteorological Society of Scotland, is to be found in Table XIV.

In Table XV. is found, among other things, a statement as to the chief meteorological phenomena during each month of the year in eight of the Principal Towns, with the deaths from some of the more important miasmatic and other diseases placed alongside for sake of comparison.

There were seven deaths from Small-Pox during the year, registered in the months of October, November, and December. Deaths from Measles attained their maximum in December, when 386 are registered, the minimum being observed in January, when 30 deaths resulted from that disease. Scarlet Fever caused its largest number of deaths during the last three months of the year—67 in October, 88 in November, and 59 in December—being fewest during February (15) and April (17). The deaths from Hooping-Cough reached their maximum in March and May (116), when they fell gradually until October, reaching the minimum of 36. Diphtheria caused its largest number of deaths during January, March and December, while Fevers caused the maximum number of deaths during the winter and spring months of the year.

Phthisis causes its largest number of deaths during the winter months at each end of the year, and those of spring, and Croup bulks most largely during the first two and last three months.

TABLE XVII.—Monthly Deaths at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1892, and Proportion at each Age in every Hundred Deaths per Month.

MONTHS.	Actual Number of Deaths in 1892.					Proportion at each Age in every Hundred Deaths per Month.

YEAR	11,743	2,652	9,731	6,364	30,490	38·5	8·7	31·9	20.9	100

Upon the incidence of the more acute Diseases of the Respiratory Organs, as Bronchitis and Pneumonia, climatic conditions have an admittedly distinct bearing, and we accordingly find the heaviest death-roll from such to be during those months which show the lowest temperature, &c., the reverse occurring in the case of those months with the highest.

Tables XVII. and XVIII. show the relative monthly mortality at different ages among the inhabitants of the aforesaid eight towns. Thus with children (0–5 years of age) the heaviest rate was during the months of March, April, May, November and December.

TABLE XVIII.—Months equalised to 31 Days, and Deaths at each Age corrected thereto, in order to show the relative Mortality at each Age in Eight of the Principal Towns during each Month of the Year 1892.

MONTHS.	Relative Number of Deaths in 1892.					Monthly Deaths proportioned to 1000 per month or 12,000 per annum.
	0–5 Years.	5–20	20–60	60 and above.	Total.	
January	929	203	1,029	805	2,966	1,149
February	973	246	913	602	2,734	1,059
March	1,033	221	916	670	2,840	1,100
April	1,018	248	863	626	2,755	1,067
May	1020	250	891	535	2,696	1,044
June	918	246	753	443	2,360	914
July	768	210	715	415	2,108	816
August	885	194	668	439	2,186	846
September	795	228	669	409	2,101	813
October	952	201	766	420	2,339	906
November	1,263	203	838	498	2,802	1,085
December	1,382	247	870	603	3,102	1,201
YEAR	11,936	2,697	9,891	6,465	30,989	12,000

In the case of Adolescents (aged 5–20 years) the deaths occurred in largest proportion during February, April, May, June, and December.

In Adults (20–60 years) the same is to be observed during January, February, March, and May.

And lastly, the mortality among the Aged—those over sixty years—is greatest during the earlier and later months of the year, those, in fact, which were most inclement, and therefore hurtful to both old and young.

The general mortality among the total population of the eight towns in 1892 was greatest during December, followed by January, March, November, April, February, May, June, October, August, July and September.

REPORT

ON THE

VACCINATION OF CHILDREN

BORN IN SCOTLAND DURING 1891.

The returns for the year 1891 show that of the 126,076 children born in Scotland, 107,482 or 85·251 per cent. were successfully vaccinated. In 2,637 cases, vaccination was postponed upon medical authority, being at the rate

of 2·092 per cent.; in 268 cases, or 0·213 per cent., the children were certified on account of some constitutional peculiarity, to be insusceptible of vaccination; in one case, or 0·001 per cent., the certificate was to the effect that the child was insusceptible of vaccination in consequence of already having had Small-Pox; and 280 children were insusceptible on account of having been previously vaccinated, although not by persons qualified to give a certificate to that effect, being at the rate of 0·222 per cent. of the whole births. 12,293 or 9·750 per cent. of the children born died before vaccination; and 3,115 or 2·471 per cent. were removed from the district in which they had been born, and consequently lost sight of, or were otherwise unaccounted for. The proportion of cases successfully vaccinated is 1·404 per cent. below the average for the last ten years, and the proportion of postponed cases 0·345 per cent. above the average for the same period.

In Table XX. the number of children who died before vaccination is deducted, and the proportion given to the total number living. From this Table it is seen that of the 113,783 children who lived to the age of six months, 107,482 were successfully vaccinated, being at the rate of 94·462 per cent.; vaccination was postponed in 2,637 cases, or 2·318 per cent; 268 or 0·236 were stated to be insusceptible constitutionally of vaccination; 1 or 0·001 per cent. was insusceptible from having previously had Small-Pox; and 280, or 0·246 per cent., were insusceptible in consequence of previous successful vaccination. In 3,115 cases, or 2·737 per cent., the children were unaccounted for in consequence of having left the district in which they were born, or from some other cause.

TABLE XX.—Vaccinations in Scotland, 1881–1891, deducting from the Births those who died befor they could be Vaccinated, and giving the Proportion of the Vaccinated to the surviving Births o each year.

Years.		Successfully Vaccinated.	Vaccination Postponed.	Insusceptible of Vaccination.			Removed from District before Vaccination, or otherwise unaccounted for.	TOTAL LIVING.

* The Small-Pox Deaths are estimated from the ascertained Small-Pox Deaths in Eight of the Principal Towns, as compared with the Total Small-Pox Deaths in all Scotland during the Twenty Years 1855–1874, but for the year 1891 no reliable estimate can be formed, as no deaths from Small-pox occurred in the Principal Towns.

TABLE XXII.—Small-Pox Deaths in Eight of the Principal Towns of Scotland at different Ages in 1892, also during the Ten Years 1875–1884 and 1865–1874, compared with those in the same towns for the Ten Years before the Vaccination Act came into operation, viz., 1855-1864.

N.B.—Districts containing Parliamentary and Royal Burghs are printed in capitals, thus:—EDINBURGH. Districts containing Towns of 2000 Inhabitants and upwards are printed in small capitals thus:—CARLUKE.

An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated, or are comprised of more, or parts of more than one Parish, and the component parts of these Districts will be found on page 43.

A dagger "†" is prefixed to those Districts which consist of only a part of the Civil Parish of the same name.

APPENDIX.

VACCINATIONS, 1891.

EXTRACTS FROM THE REGISTRARS' NOTES RELATIVE TO THE WORKING OF THE VACCINATION ACT.

I. NORTHERN DIVISION.

1. Shetland.

10. (2) Whiteness and Weisdale.—A number of weakly and scrofulous children who were born in 1890 still remain unvaccinated.

4. Sutherland.

53. Lairg.—The vaccination of children was interrupted for a considerable time owing to the prevalence of Diphtheria and Scarlet Fever.

II. NORTH-WESTERN DIVISION.

5. Ross and Cromarty.

Insular.

86. (*a*) Barvas.—The large number in Column 2 is accounted for through the Docter being laid up with Typhus Fever.
86. (*b*) Carloway.—The Doctor, through being attacked with Typhus Fever, was unable to vaccinate.

6. Inverness.

Mainland.

99. (1) Glengarry.—The Vaccination Act works very well upon the whole, considering the long distances parents have to travel to meet the Doctor.
99. (2) Lochaber.—Owing to the Parish being so extensive, great difficulty is experienced in obtaining the Vaccination Certificates.

Insular.

117. (1) North Snizort.—Vaccination well attended to.

III. NORTH-EASTERN DIVISION.

7. Nairn.

121. Auldearn.—The requirements of the Vaccination Act continue to be well attended to.

9. Banff.

157. (2) Glenlivat.—Vaccination very irregularly attended to.

10. Aberdeen.

168. (2) Aberdeen (Aberdeen District.)—The number of cases in Column 5 arose from the Doctor, who successfully performed the operation having died before granting the Certificates.
174. Belhelvie.—Vaccination well attended to.
183. Crathie and Braemar.—In this District Vaccination has been well attended to.

IV. EAST-MIDLAND DIVISION.

12. Forfar.

313. Murroes.—The number of children, who died before Vaccination, above the average.

V. WEST-MIDLAND DIVISION.

17. Stirling.

479. (2) Falkirk.—The Authorities have recommended the re-vaccination of adults.
488. (2) Bannockburn.—The large number of cases in Column 2 is accounted for by the prevalence of Measles.

19. Argyll.

Mainland.

511. Glassary.—Owing to the illness of the children, the six cases in Column 2 are postponed until February 1893.

Insular.

551. (2) COLL.—Owing to the District being re-arranged for Vaccination purposes, the Act has been much better carried out this year.

VI. SOUTH-WESTERN DIVISION.

22. AYR.

577. (1) AUCHINLECK.—Only two children died before Vaccination.

578. AYR.—No objections were made to complying with the Vaccination Act during this year.

590. (2) TROON.—About one-third of the parents had to be reminded by letter to have the Vaccination of their children performed within the prescribed time.

23. LANARK.

644. (8) MILTON (GLASGOW.)—Two parents were fined by the Sheriff for refusing to comply with the terms of the Vaccination Act.

VIII. SOUTHERN DIVISION.

32. KIRKCUDBRIGHT.

875. LOCHRUTTON.—Vaccination well attended to.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES BY AN ASTERISK (*).

No.	Districts.	Component Parts (Parishes).
14	Deerness	Part of St Andrews.

Crosshill, . 584

* The actual number of Districts is 1051—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 5 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.

Crossmichael, 863
Croy & Dalcross, 94
Cruden, . 185
Cullen, . 150
